

NEWS RELEASE

Date: 17th December 2016

HEURSTON GROUP PLC have signed an agreement with TEC to secure content

The Heurston Group PLC (Heurston) is pleased to announce that it has signed a license agreement with **TRINIDAD ENTERTAINMENT CORPORATION LLC (TEC)** securing in excess of 3,500 hours of video content.

This opportunity provides Heurston access to a large video library, which is both high quality and significant. The genre offered in our mix of movies will include Latest Releases, Entertainment, Health, Education, Lifestyle, Environment, History, Space, Weird and Wacky, Science and Technology, Biographies, Animals, Travel and Kids, Automobiles/Machines, Sports library and TV series.

The license agreement is for 5 years and initially provides for the rights to Indonesia, Malaysia, Philippines and Romania. Heurston will be progressively rolling out the library in other regions. We believe that there is great demand for a quality library and we intend to continually add new movies. There will also be a particular emphasis on securing local content in these markets.

This agreement has strategic importance, as it provides Heurston the rights to promote the library to any digital service provider in these regions. Heurston is also able to provide the library to Streamark plc, our subsidiary live streaming company, under favourable terms. This will greatly enhance the offering to the prospective customers as it provides a total solution from the studios to the end users.

"Many of our prospective customers have asked if we are able to provide content together with streaming services. We are now able to do that. Securing this content allows us greater reach into the entertainment industry and is of significant benefit to our Streamark offering. This also is a prelude into the launch of our educational and health divisions" commented Peter Lombardo (Director of Heurston)
